

The Quantum Resistant Ledger: QRL

# ZOND WEB3 WALLET

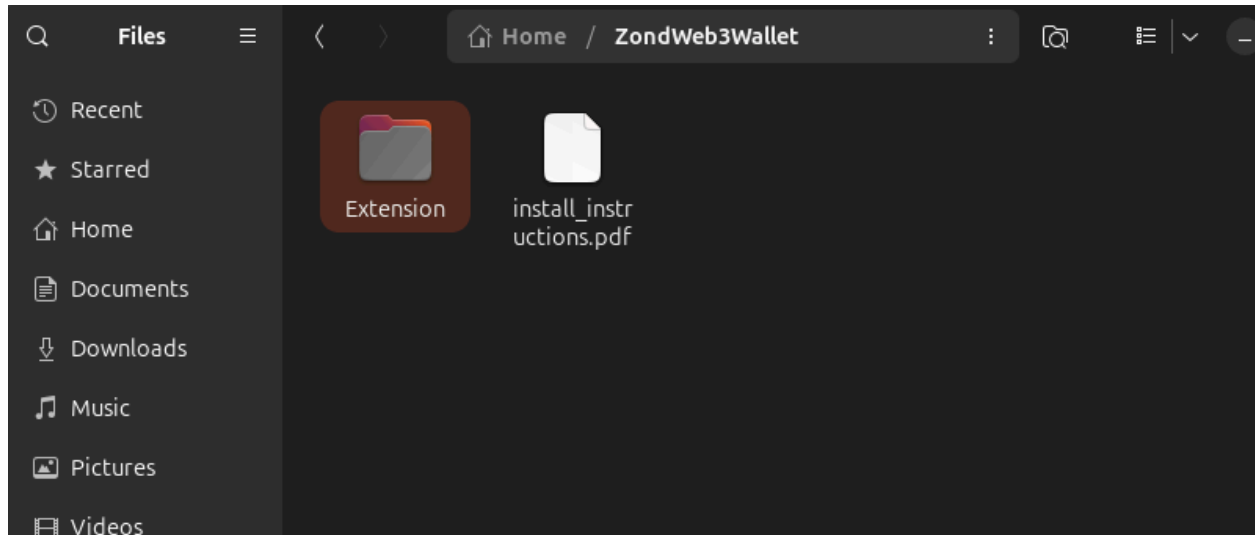

## Installation Instructions

## Installing the Zond Web3 Wallet browser extension in Chrome

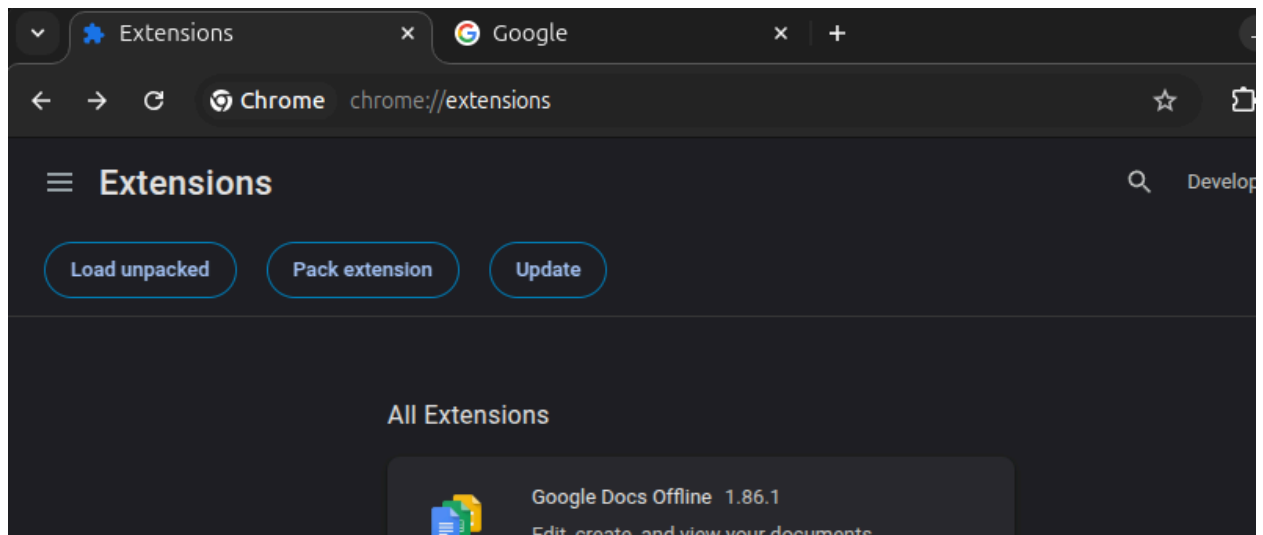

## 1. Get the Extension first!

You might have received a zip file **ZondWeb3Wallet.zip** which when extracted, gives the following contents.

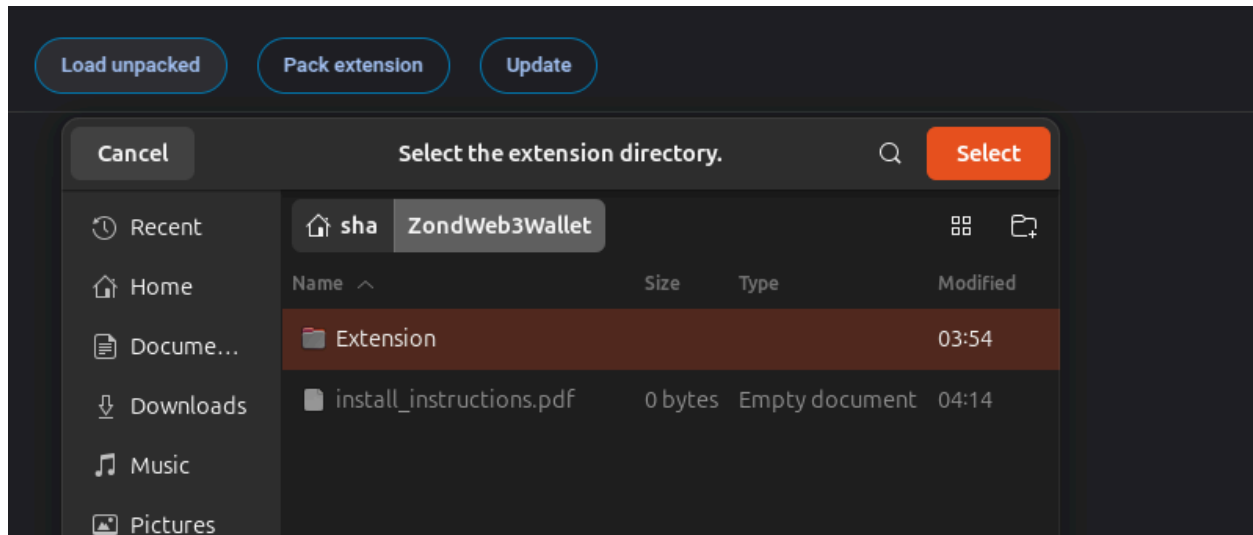

## 2. Open the Extensions tab in the browser

Open a new tab in Google Chrome and visit **chrome://extensions/**. You may also open it via the browser settings page.

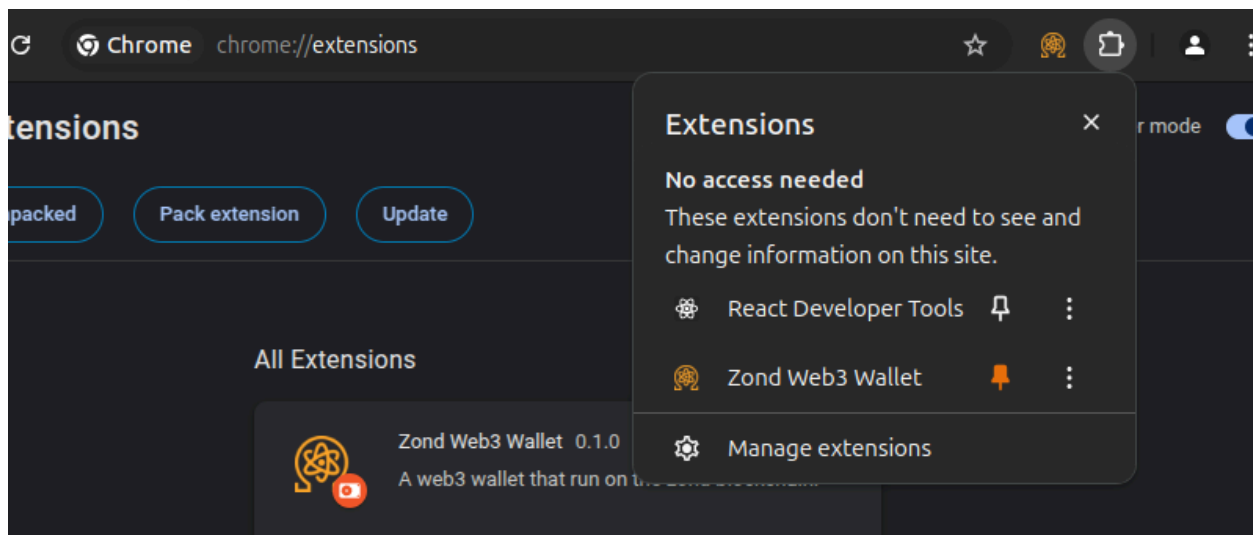

### 3. Load the extension to browser

Click on the **Load unpacked** button, and select the **Extension** folder.

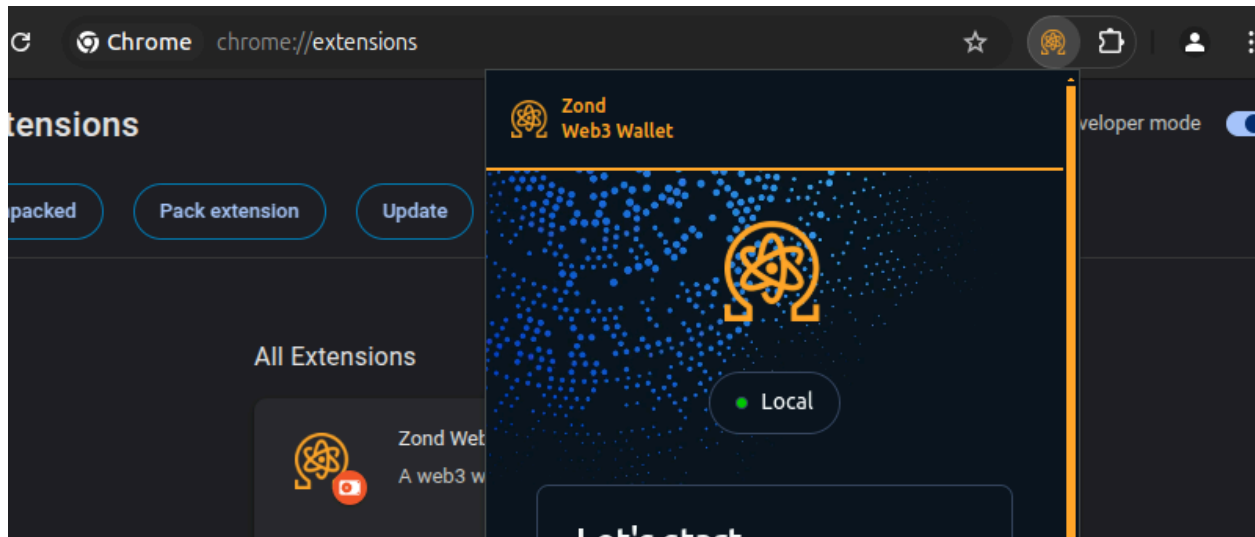

### 4. You have Zond Web3 Wallet in your browser now

Make sure you see the Zond Web3 Wallet under the installed extensions. You may also **pin the extension** for quick access.

## 5. Check if it's working

Just click on the **extension icon** and see if it's loading correctly without any errors.

## 6. And, one more thing...

You may have to configure the **IP address and port** in order to connect to the Zond blockchain network.
